

CHECKLIST

Preparation

- 1.0 Make sure Master Modeler is loaded on your machine
- 2.0 Make sure the Orbix daemon is running (.../ideas/ms6/orbix/README)
- 3.0
- 4.0

Demonstration Installation and Setup

- Copy or unload the demo files to a local directory
- cd to the directory containing the demo files
- Start I-DEAS
 - Project = Any
 - Model File = No model file
 - Application = Design
 - Task = Master Modeler
- File, Import, IDEAS Universal File
 - 'Zip_PMI_Vignette.unv'
-
- Do the following manually or run
 - 'Zip_PMI_Vignette.prg'

- Units, MM
- Display Filter, Parts, Centerlines, Coordinate Systems=Off, OK
- Display Filter, Workplane=Off
- Display Filter, Annotation=On, Measurement Point Labels=On, OK,OK
-
-
-
- Manage Bin, Get 'Motor Lower Housing', Done
- Iso View
- Zoom All
- Shaded Display

- Save - use any name you like, i.e., 'Zip_PMI_Vignette'
- The demonstration is now ready. The above setup only needs to be done once (don't save over your start model file, during the demonstration, make incremental saves under a new name).

-
- The figure displays two software menus. The left menu, titled 'Annotate', contains icons for dimensioning (arrow and dimension line), adding a dimension value (checkmark and '62'), creating a dimension line (two circles), adding a dimension line (checkmark and 'A'), adding a dimension line (checkmark and 'A'), and adding a dimension line (checkmark and 'A'). The right menu, titled 'I-DEAS Icons', contains icons for File, Options, Help, Design, Master Modeler, and various geometric modeling tools like Extrude, Revolve, Sweep, Loft, Fillet, Chamfer, Mirror, and Rotate. The 'I-DEAS Icons' menu also includes a 'Close' button at the bottom.

Create Measurement Points...

- Zoom in around area shown

- Measurement Point...

Pick the part

Hit 'Place Measurement Points' button on form

Pick the highlighted surface shown (F90), Done
MB3, Series

Pick edge shown (E305), Done, Edge offset=0

Hit 'OK' on 'Reference Series' Form (6 ref points created)

MB3, 'Pick Existing', pick one of the series ref points, Done

Hit 'OK' on Create Measurement Points form

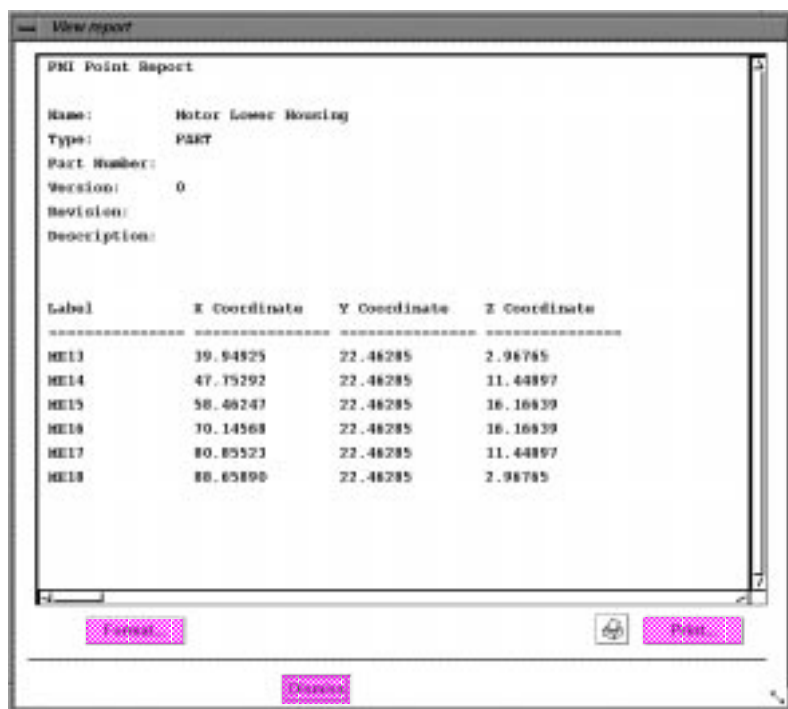

1/14/97

Create a point report and attach it to the part...

•Point Report...

Pick one of the measurement points, MB3, ALL, Done
Print the report to a file

•Notes...

Pick the part
push the point report down into the window
Hit 'Attach with leader line'

Create Note

Part Name: Motor Lower Housing

Name: NT4

File Name: /usr/people/rickers/Zip_PMI/points.rpt

Note:

Label	X Coordinate	Y coordinate
